Project Based Learners Needed!

Here at MNCS we love to do projects! A project is something that you create to teach other people about a topic that interests you. Projects take lots of planning, research, and creative thinking. Are you up for the challenge?

To begin you need to plan your project. Fill out your plan below.

<p>I am interested in....</p> <p><i>(This is called your topic, it is the subject of your project).</i></p>	<p>I already know these facts about my topic:</p> <ul style="list-style-type: none">•••
<p>The things that I wonder about my topic are:</p> <ul style="list-style-type: none">••• <p><i>(These are your research ideas).</i></p>	

You will create a project to teach others about what you learned. Draw a picture of what you want to make. Include 2-3 sentences describing what you want to make.
